

FOR KIDS AGES 7 TO 12

The 5 Golden Rules

Print this out and stick it somewhere you'll see it, like the fridge or your desk. These are the rules Bo the Beacon Pup teaches in FamilyShield Online's Kids Corner.

1**Keep it private.**

Don't share your name, school, or address with people you only know from games or apps.

2**Passwords are just for you.**

Not even your best friend gets to know them.

3**Secrets are a warning sign.**

If someone online says "don't tell your parents," that's the moment to tell them.

4**You can always say no.**

To photos, to video calls, to anything that feels weird. Your feelings are the alarm bell.

5**Tell, don't hide.**

If something online confuses or scares you, a trusted grown-up wants to know, and you won't be in trouble.

For grown-ups: talk through each rule together instead of just handing this over. The full guide, with gentle safety missions to go with these rules, is at familyshieldonline.com/kids-corner.html.
